# ABOUT JUST SPICES

## WHO IS JUST SPICES? AND HOW DOES IT WORK?

The idea for Just Spices ([justspices.co.uk](http://justspices.co.uk)) came to life in 2014. Since then the spice company offers their customers, through its own online shop and in food retail, numerous blends of spices that are not just easy to use but also make every dish more tasty - no matter how stressful life might be. And that with 100 % natural ingredients and without any additives. So today the days of too much guesswork how to make great tasting food at home are over - thanks to Just Spices.

Having revolutionized the spice market in Germany, Just Spices brought its delicious spice blends to the UK in April 2022 with the goal of bringing more joy and inspiration into British kitchens, too. With more than 150 employees Just Spices symbolizes high quality and zero product additives. **But most importantly, our key aim is to make delicious things even tastier and to encourage as many people as possible to cook for themselves with joy and satisfaction.**
